We participated in the Skill India program conducted by Youth for Seva (YSS) called Computer Training. We divided into groups depending on our location. We went to schools to teach computer science basics to students of 6th to 7th standard. We felt very blessed to have this opportunity presented to us due to which we were able to impart the knowledge we have been gathering over the years on computer science. We thought students the basics on computer like what does it do, its advantages and disadvantages, how computer would help our life. We conducted several theory sessions and practical session to make student understand using Kannada and English languages.
